

ICON is the annual journal of ICOHTEC, the only international organization for the history of technology. In line with the aims of ICOHTEC, **ICON** will provide a forum for the discussion of relevant issues in the history of technology. Emphasis will be placed particularly on international technological relationships, thereby fostering co-operation amongst scholars from all parts of the world.

ICON will comprise mainly, but not exclusively, refereed papers based on research presented at ICOHTEC symposia. Volume 1 includes papers from the meetings held in Zaragoza (1933) and Bath (1994).

ICON will cover all aspects and periods in the history of technology but will devote special attention to the discussion of contemporary problems of technology in their socio-economic and cultural settings.
